Clinical Faculty Promotion and Appointment Committee
South Shore Hospital
55 Fogg Road
South Weymouth, MA 02190

Dear Sir or Madam,

I would like to strongly recommended, without any reservations, Dr. Kamran Manzoor for promotion to the position of Clinical Associate Professor of Medicine in the Department of Pulmonary and Critical Care Medicine at Tufts University School of Medicine. I believe the combination of his excellent clinical teaching skills, trackrecord of engaging trainees in research projects, and history of mentoring medical students provides ample justification for his promotion to Clinical Associate Professor of Medicine.

I have known Dr. Kamran Manzoor since 2019, when I rotated at South Shore Hospital as a Tufts University sub-intern in the Intensive Care Unit. His enthusiastic approach to teaching was inspirational—so much so that it helped inform my current career trajectory. Dr. Manzoor constantly encouraged me to understand not only what to do for patients but why certain diagnostics or therapies were chosen and what the evidence supporting them was. His kindness, warmth, and enthusiasm for evidence-based medicine played a large part in decision to pursue Pulmonary and Critical Care Medicine.

Dr. Manzoor and I have also worked on multiple research projects together, including while I was a medical student at Tufts and as an Internal Medicine resident at Brown University. In total, we have published or presented six research items (see attached for references), and we currently have several more ongoing projects. I can genuinely attribute Dr. Manzoor's encouragement and continued collaborative efforts as a key part of my personal interest in pursuing a research-focused career in Pulmonary and Critical Care Medicine.

Finally, I have also witnessed Dr. Manzoor's ongoing commitment to mentoring other Tufts medical students. Dr. Manzoor introduced me to a Tufts student (now alumnus) interested in Internal Medicine and possibly Pulmonary and Critical Care Medicine. The three of us are currently working on a research project together, and I have specifically heard from the Tufts alumnus that Dr. Manzoor had consistently made special efforts to mentor and guide them when they were in the residency application process.

Overall, I consider myself fortunate to have met Dr. Kamran Manzoor, as his influence and support have been foundational in my professional life. I echo my strongest recommendation for his promotion to Clinical Associate Professor of Medicine in the Department of Pulmonary and Critical Care Medicine at Tufts University School of Medicine.

Sincerely,

A handwritten signature in black ink that reads "Eric Robbins".

Eric Robbins, M.D.
